

MISTRAL

SOLID SURFACE WORKTOPS

WHAT IS MISTRAL?

Welcome to MISTRAL, a worktop range that gives you the look of natural stone with the day-to-day benefits, design flexibility and great value of our enhanced acrylic solid surface.

MISTRAL gives you the colour, shape and style you want without compromise.

Here you'll find the features of MISTRAL and examples of how it can be used to great effect in your kitchen.

SEAMLESS AND STUNNING

At the heart of every MISTRAL kitchen are the seamless joints that discreetly form one continuous surface that flows around the room as if moulded from a single piece.

MISTRAL is made entirely of solid surface material. This allows it to be angled and

curved to fit your design effortlessly. MISTRAL's endless options give you the advantage of being able to create unique features and bring your ideas to life.

PERFECTLY FORMED

With the benefit of MISTRAL's flexibility you can get the very best from your space. Your worksurface can be crafted to follow the natural dimensions and features of the room or the lines of innovative furniture shapes adding great character to your kitchen.

Where space is at a premium it is the little things that can make a big difference and where designers really show their talents. An angled corner here, or an internal curve there can introduce a sense of space that didn't appear possible.

WHATEVER YOUR STYLE

One of the first considerations when designing a kitchen is to choose a style. There are many categories and sub-categories from the traditional to the contemporary and everything in between.

Your own kitchen needs to suit your personality and with MISTRAL's versatility and timeless colour choice, you can create your own unique style with ease.

MISTRAL COLOURS

MISTRAL's range is a timeless collection that gives you all the choice you need to find the right colour for you.

Whether you want your worksurface to be the dramatic statement piece for your kitchen décor, or you are looking for something to harmonise within your colour scheme, it's here.

The great news is that all MISTRAL colours have the same foundation, so each worktop delivers the same great performance no matter which colour you choose!

WINTER DRIFT

ZIRCONA

We want to ensure your expectations are met, so here are a few practical notes to consider when deciding on your worktop colour.

Darker colours may show general wear more readily than other colours as any scuffs and marks that may appear will be white so are more apparent on a darker surface. For high traffic areas we would recommend the use of a lighter MISTRAL décor.

Marble-inspired colours have a unique patterning that occurs in each worktop creating their wonderful organic look. Joints in these décors are seamless and smooth but may be more obvious as a result of this expected variation.

UTILISE THE SIZE

Larger scale projects are an opportunity for grand design as they offer the freedom of space to think big!

MISTRAL's seamless joints and endless shaping possibilities help to seize this opportunity to form expansive, signature islands that become the hub of all kitchen activity.

IGNEA

EVERYDAY WITH MISTRAL

MISTRAL is smooth and non-porous so it is inherently hygienic and resistant to staining without needing to be sealed.

Unlike most other worktop materials, MISTRAL can be replenished and repaired so scuffs or marks from any accidents or mishaps can be removed leaving the surface as good as new.

MISTRAL's surface takes on the ambient temperature so is not cold to the touch. This not only gives it a more homely feel, but also makes it the ideal surface for making bread dough!

ALL IN THE DETAIL

It's the finishing touches that will take your kitchen to the next level.

Edge profiles, drainer grooves and wet areas are examples of the surface being crafted to create attractive and practical features. Upstands and splashbacks are also available to continue the MISTRAL effect vertically on walls. End panels are also used to add a decorative finish to open-ended cabinet runs.

DESIGNED TO COMPLEMENT

The natural adaptability of MISTRAL can add extra dimensions to your kitchen design, working in harmony with other materials and products to beautiful effect. So, from worksurface materials such as wood, to tiles and other wall coverings, MISTRAL is the perfect partner.

MISTRAL is compatible with solid surface sinks which can be seamlessly fitted to create a continuous flow between the worktop and the sink.

In addition to this, MISTRAL can be used with other accessories including ceramic and stainless steel sinks, surface mounted pop-ups and a host of different appliances used in modern kitchens.

MISTRAL SPECIFICATIONS

CLEANING AND CARE

MISTRAL's non-porous surface does not allow stains to penetrate. Any spills can simply be wiped clean with a cloth and soapy water, or with the assistance of a general household cleaner for more stubborn substances.

To keep your MISTRAL worktops looking their best, we recommend the use of our surface care products, including our Solid Surface Guard and Cleaner.

IMPACT RESISTANCE

MISTRAL is a strong and durable surface and will cope well with the rigours of day-to-day use in the home. In support of this, we would recommend the use of chopping boards so that you are not cutting directly on the surface.

REPLENISHABLE

Unlike most other worktop materials, the surface of MISTRAL can be sanded. This means it can be refinished at any time during its life to remove any general wear and tear marks that may have accumulated, leaving it looking as good as new.

HEAT RESISTANCE

MISTRAL worktops have been developed to offer high levels of fire safety and have the ability to cope well with heat. However, you should not place hot pans, dishes or heat-generating appliances directly onto the surface, always use heat pads, surface protectors or trivets.

DARKER COLOURS

Darker colours may show general wear more readily than other colours and therefore require more care. For high traffic areas we would recommend the use of a lighter MISTRAL décor.

Don't forget, samples of all colours can be ordered from our website for you to get a feel for the product and its appearance.

MANUFACTURER'S WARRANTY

MISTRAL's beautiful appearance and valuable physical qualities are backed up by a field-tested 10 year manufacturer's warranty. MISTRAL has been installed, tested and proven in a variety of tough commercial applications before being utilised in the residential sector.

Please visit our website to register your warranty.

Please Note: Colours shown in this brochure are a printed representation and we would recommend that you refer to an actual sample before making your final decision.

THE UNIQUE COLLECTION

MISTRAL

MISTRAL's latest developments continue the successful fusion of nature's beauty and the practicalities of this adaptable man-made material.

The Unique Collection brings together the already popular Aria and Moonscape decors with three brand new marble-inspired designs that will take solid surface to a whole new level.

ATACALMA

MOONSCAPE

RIVER ROCK

ARIA

SEASTORM

ARTFULLY CRAFTED. BEAUTIFULLY UNIQUE.

The Unique Collection has been developed to emulate the beauty of natural stone, from classic marbles to the majestic swirls of granite, in a worktop that offers the design possibilities and practicalities of use that our MISTRAL range is renowned for.

These colours are made from the same enhanced acrylic material as the rest of the MISTRAL range, so will deliver the durable, hygienic, replenishable surface with limitless design possibilities that our customers have come to expect.

By retaining the benefits of our solid surface material, the Unique Collection offers marble-inspired colours with features such as seamless joints as they follow the usual MISTRAL process.

While the pattern may deliver a more apparent joint than the core Mistral decors, the physically seamless benefits are still achieved by using the standard Mistral jointing process. Therefore they continue to provide that “carved from a single piece” look that’s not achievable when using granite, marble or quartz.

Each worktop has a natural variation, with the flow of the pattern creating an organic appearance that adds a whole new dimension to surface design. The unique patterning occurs within every product and is the essence of these wonderful new decors.

To help you choose the perfect Mistral decor for your requirements, we provide a sample service to help give you a visual idea of the colour and tone, as well as a true feel of the material.

However, it is difficult to get a complete appreciation of these Unique Collection colours in a sample due to the scale of the marbling and swirls. We recommend that alongside the sample you refer to the swatches in this brochure as well as photos of full installations so that you can get the best understanding of how the finished worksurface will look.
